

“The main thing is to keep the main thing the main thing.”

- Stephen Covey

IS CYBER SECURITY YOUR “MAIN THING”?

- ◆ More than 3,800 publicly disclosed breaches occurred exposing an incredible 4.1 billion of compromised records.
- ◆ 67% of businesses have experienced a Cyber attack.
- ◆ Infected routers and connected cameras account for 90% of the targets of IOT attacks.
- ◆ Cyber attacks on the utility industry are increasing with at least one shutdown or operational data loss per year.

THE CHALLENGE

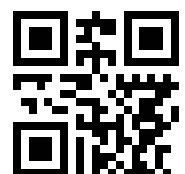

Research predicts that by 2022, the costs of Cybercrime will have exceeded \$8 Trillion. Although 59% of companies report increasing Cyber Security budgets, only 4% say they have assessed the implications of their strategies. Having just a security certification or a standards compliance as a strategy does not guarantee 100% protection.

Threat landscape has seen a drastic change with rapid adoption of IoT devices and IT/OT integration. IoT devices are easy “sitting ducks” for hackers as there are limited options of effective endpoint protection.

With a hacking attack occurring every 39 seconds, it's imperative that companies have the necessary security measures in order to survive as a formidable business.

CISO's are expected to have answers to the following questions:

- ◆ What threats does your organization face?
- ◆ Which of those threats are most probable?
- ◆ How prepared are you to face these threats?
- ◆ What is your Incident response and threat response strategy ?
- ◆ Do you have the right partner to execute your Cyber Security Strategy?

YOUR SECURITY PARTNER

Netcon brings value and expertise from security strategy, **security architecture design**, to **risk management** and security monitoring.

With a team of highly qualified and skilled professionals armed with certifications like **CISSP, CISA, CeH, CCIE** security, we are well-positioned to be your Cyber Security Partner.

Our team's expertise in IT/OT integration enable us to provide an integrated approach to Security Transformation (Sx) strategy.

“ Cyber Security is a shared responsibility, and it boils down to this: **IN CYBER SECURITY, THE MORE SYSTEMS WE SECURE, THE MORE SECURE WE ALL ARE.** ”

OUR EXPERTISE

 Advanced Threat Protection

 Security Management & Orchestration

 Vulnerability Management

 Penetration Testing

 Breach Attack Simulation

Our offerings are aligned to meet the below standards & compliances.

Cyber Security Framework

OUR SERVICES

 Consulting Services

 System Integration

 Managed Services
