

IT NERVE CENTER

DATA CENTER

- ◆ Currently, the businesses thrive on Internet and data. The amount of data created is expected to rise to 40 ZB by the year 2020.
- ◆ Edge computing redefines the Data Center strategy of organizations.
- ◆ Outages continue to cause significant problems for operators.
- ◆ Kilowatt (kW) rack density is rising which is causing many to rethink cooling strategies.

When it comes to your Data Center options, decisions are not easy for a CIO:

- ◆ The Right Data Center Strategy: Captive/ Outsourced/ Hybrid.
- ◆ The Availability Tier Objective: Tier II/III/IV.
- ◆ Space, Power, Cooling and Connectivity Options.
- ◆ Standards and Best Practices.
- ◆ The Data Centre Operations (DCO) strategy.

We **DESIGN & BUILD** Tier III/IV Data Centers

A Tier IV Data Center offers

Zero Single
Point Failure

99.995 %
Guaranteed
Uptime per
Annum

2N
Infrastructure

Less than 26.3
Minutes of
Downtime Per
Annum

Min. 12-hour of
Independent
Power Capacity for
Outage Protection

YOUR **DATA CENTER** PARTNER

Netcon specializes in providing end-to-end solutions that encompass all your company's Data Center needs right from **Physical Infra** to **Hybrid Cloud Solutions**.

With Senior Consultants who are **Accredited Tier Designers (ATD)** certified by Uptime Institute, **Certified Datacenter Specialists (CDCS)** and Experienced MEP consultants, Netcon offers Consulting, System Integration and Managed Services for building and operating data center ranging from small enterprise server rooms, edge data center to HyperScale Data Center.

We help build your Data Center right from "site selection to service roll out", whether it is a captive or Internet Data Center for hosting & cloud services.

Count on us for the right advice to optimise your existing Data center infrastructure in terms of increased efficiency, availability and standards compliance.
